

FIELD system

FIELD system ZDT Viewer (Zero Down Time Viewer)

DESCRIPTION

FIELD system ZDT Viewer is an application that helps checking the status of all ZDT servers registered in this application on a single screen. ZDT is a PC software to reduce unexpected downtime of FANUC robots by monitoring their condition.

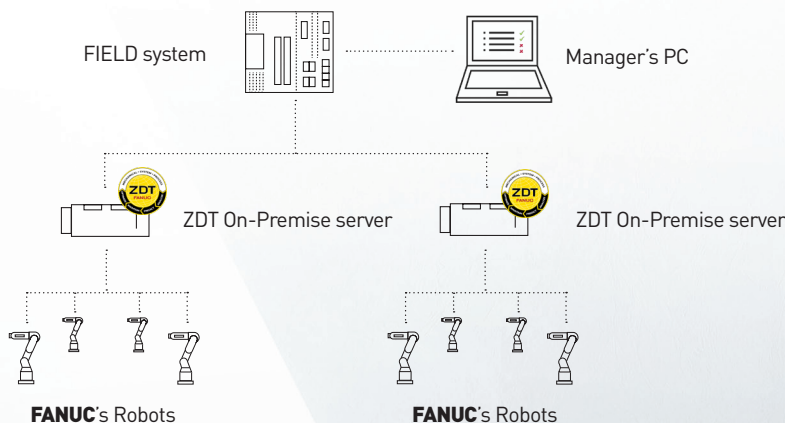

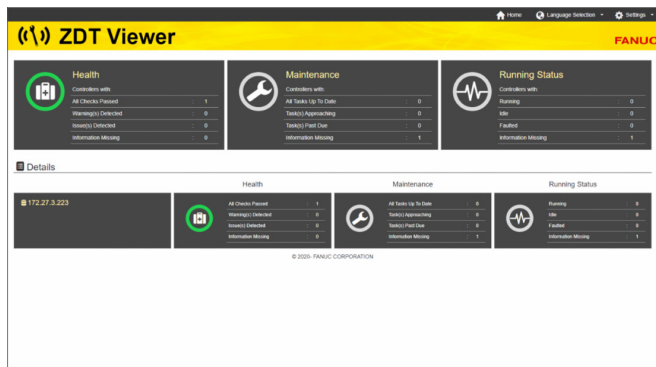

KEY BENEFITS

- Keep monitoring within FIELD system platform
- Monitor abnormalities from normal equipment conditions
- Improved analysis through easy access to robot data
- Save time thanks to the visualisation of all ZDT servers on a single screen

KEY FEATURES

- ZDT status monitoring within FIELD system
- Information from multiple ZDT servers (On-Premise)
- Complete status of FANUC robots fleet on a single screen
- Quick access to detailed information by links to ZDT servers (On-Premise)
